This is to certify that heat number A88788 is in comformance with the required specifications.

Radioactive emissions are at background levels.

APPROVED BY:

Supervisor, Chemistry Laboratory and Billet Inspection

ISSUED BY QUALITY ASSURANCE:

Date: 24 Sep 2007

Specification Clerk

Heat analysis obtained by test methods ASTM E415 and ASTM E1019.

^{*}Minimum and maximum refer to the required customer specification.

This is to certify that the material is in conformance with the required specifications.
